1. The abstract of the disclosure is objected to because the abstract currently recites the phrase "is disclosed" which should be avoided in the abstract. Correction is required. See MPEP § 608.01(b).

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-51 of U.S. Patent No. 6,842,563 in view of Eggleton et al 6,438,277. The claims of the '563 Patent recite an input optical waveguide comprising Bragg gratings for coupling a plurality of wavelengths in a coupling zone and a plurality of waveguides intersecting in the coupling zone. The '563 Patent claims do not recite the heating or cooling elements. Eggleton et al discloses in column 2 lines 5+ resistive waveguide heaters. It would have been obvious to a person of ordinary skill in the art at the time of the invention to provide resistive waveguide heaters to the invention of the '563 Patent claims. As taught by Eggleton, this would help tune the waveguides. The '563 Patent claims do not recite and Eggleton does not disclose the cooling element. However, cooling

elements, as well as heating elements are old and well known. It would have been obvious to a person of ordinary skill in the art at the time of the invention to include a known cooling element in the invention of the '563 Patent claims, also for the purpose of tuning the waveguide.
